Subject: Fwd: web security -- Cloud Recording - ZOOM meeting is now available
To: GL/Itec/modr 2915 class <itec2915en@yorku.ca>

To my students in Itec/MODR 2915:

The link below gives you the video recording for the question(s) on
web security. I said clearly in the video that I deliberately made the
mistakes and next corrected them so that you may gain some experience.
They are "wilful" mistakes to help you, at 5:12 and 5:37 minutes.

Summary:
--   0:32 We wish to protect the URL:
http://oldtown.glendon.yorku.ca/~sandy01/itec2915/2/homework1
with a username "tintin1" and a password "glendon" at minutes 7:08
--   from minutes 7:44 forward, we set up distinct, multiple
usernames and passwords.

*** You will see the similar questions in homework and tests, see also
lecture notes on web security ***
